Jimmy Meet

Jimmy Meet is the simplest solution to manage meeting rooms & shared spaces.

It helps make meetings more productive for users and optimises the real estate usage for organizations.

It is the smartest way to manage visitors and out-station employees

Why JM?

Schedule & Start your meetings instantly

Great user experience

Modular Solution

JM Room Manager

Simple on-premise or cloud based software suite to manage meeting room bookings and calendar notifications..

Publish room information in a intuitive way on room door/entry displays based on Android OS.

JM Hub

Simple hardware modules supporting the Jimmy Meet eco-system that transforms your meeting rooms into a clutter-free digital cockpit for effective meetings. No more keys, legends, menus, or operation delays. Start and conduct your meetings seamlessly.

JM Client

Jimmy Meet Mobile App or client SDK for employees to reserve rooms, gain access to rooms, pantry ordering, Extend room booking time, avail housekeeping and IT support on their finger tips. IT and Asset management checklist for meeting rooms
